EDUCATION

Bachelors of Technology (CSE), Amity University - 9.25cgpa	2019-2023
Higher Secondary, Scottish Public School - 68%	2018-2019

SKILLS

Nodejs, Mongodb, Javascript, Socket.io, Reactjs, Sql, React Native, Flutter, Css, Git, Github.

EXPERIENCE

Zauvijek Tech || Software Developer Intern Feb 2023 - May 2023

- Worked on the **MERN** stack for creating dashboard for tracking and managing various activities.
- Applied efficient data retrieval and manipulation techniques, ensuring optimal performance.
- Worked on implementing Socket.io, a real-time communication library, for developing a chat support system
- Developed efficient backend APIs using MVC architecture and documented them using **Swagger**.

Konnected Mindz || App Developer Intern(Flutter) August 2022 - Sept 2022

- Built a Flutter app and gained experience in Flutter State Management using GETX.
- Implemented secure app authentication by leveraging Google Firebase's robust features.

Steam Troops labs || Backend Developer Intern April 2022 - July 2022

- Created over 30 optimized REST APIs that served the frontend **React and flutter**.
- Designed an **ER diagram** for the project, mapping relationships between 5+ schema, and implemented MongoDB as the database.
- Tested 100% of API's with **POSTMAN** ensuring accurate data retrieval, error handling, security measures.

PROJECTS

Notes Helper || *Nodejs, Express.js, Mongodb, Ejs*

- Developed website to provide free notes and question papers to students.
- Implemented authentication, account verification, automated mail service, and file upload.
- Enabled upload of notes/question papers by anyone, but displayed them on webpage only after approval([Live](#))

Vital Services || *React.js, Nodejs, Express.js, Mongodb, MUI, CSS, Python*

- Created a web app for health services with more than 8 ML models integrated with Nodejs.
- Upon each ML prediction, an automated **report** is generated within 5 seconds, allowing users to download it.
- Executed **video communication** feature allowing for virtual consultations between doctors and patients.
- Added 8+ features like authentication, mail service, image upload, Payment system, user dashboard etc.

ACHIEVEMENTS

- Solved over 500 questions on Hackerrank, Leetcode, GeeksforGeeks, and Codechef.
- Developed a theme extension for Microsoft VS Code with over 2,500 installs ([Link](#))
- Achieved a maximum rating of 1426 on Codechef and 4-star coder status on Hackerrank.
